

## PIZZAMASTER® VENTILATION REQUIREMENTS AND SOLUTIONS

### IMPORTANT!

- ✓ All PizzaMaster models conforms to ventilation recommendations set forth by ANSI/NFPA96 using EPA 202 test method.
- ✓ EPA 202 test (8hr):
  - Product: Pepperoni Pizzas
  - Result: All PizzaMaster sizes are as standard below ventless requirements, (except models 845, 935, 944 and 945)
  - Ventless Requirements: <math>< 5.00\text{mg}/\text{m}^3</math>

### SOLUTIONS

- ✓ If necessary, place oven under hood (type 2) to further limit smoke, grease and emissions from door openings.
- ✓ Modular ovens can be fitted with an extended hood (optional) for direct ventilation to effectively capture any emissions.
